Seeking Safety (SS) is a present-focused, coping skills evidenced-based therapeutic model addressing trauma and/or substance abuse issues. The model incorporates psychoeducation as well as early intervention treatment strategies. SS is manual-driven, delivered by both licensed and non-licensed trained professionals and provides a flexible curriculum. The objective of this training is to review the SS model and includes the following: (a) overview of trauma and substance abuse, (b) implementation of Seeking Safety, c) assessment tools and d) community resources. By the end of the training, participants will be able to implement Seeking Safety in their settings.

TARGET AUDIENCE: Open to DMH staff and contracted providers working with adult mental health consumers

OBJECTIVES: As a result of attending this training, participants should be able to:

1. Identify key clinical issues relevant to trauma exposed populations.
2. Identify key clinical issues associated with substance abuse treatment.
3. Practice skills to increase empathy and understanding of the impact of trauma and substance abuse.
4. Demonstrate knowledge on administering the manualized Seeking Safety model.
5. Identify key elements necessary to provide culturally appropriate assessment and treatment resources.
6. Identify effective interventions to apply using SS with diverse populations and communities.
